

Net Energy Metering 2.0

Net Energy Metering (NEM) – allows solar PV generators to earn full retail payments for surplus electricity.

- **1/28/16 – CPUC votes (3/2) to extend NEM until 2019. Implements provisions of AB 327 (Perea).**
- **In general, applies to residential customers with a few notable exceptions.**
- **Declines to impose new fixed charges on solar customers, until issue has been studied further by CPUC.**
- **Push to “time of use” rates to reflect real-time costs of generating and transmitting electricity.**
- **Adds modest increase to “non-bypassable” charges to assure fairness.**
- **2019 – CPUC deadline to reconsider net metering policies.**
